

ATTACK SIMULATION & PURPLE TEAM AUTOMATION.

Continuous Testing | Revenue Generation | Competitive Advantage

PENETRATION TESTING IS NO LONGER ENOUGH.

Penetration testing is a valuable, point-in-time service, but typically only performed once-a-year due to the cost. And, while these tests can expose security detection and alerting “blind spots”, they often only test a limited set of attack techniques.

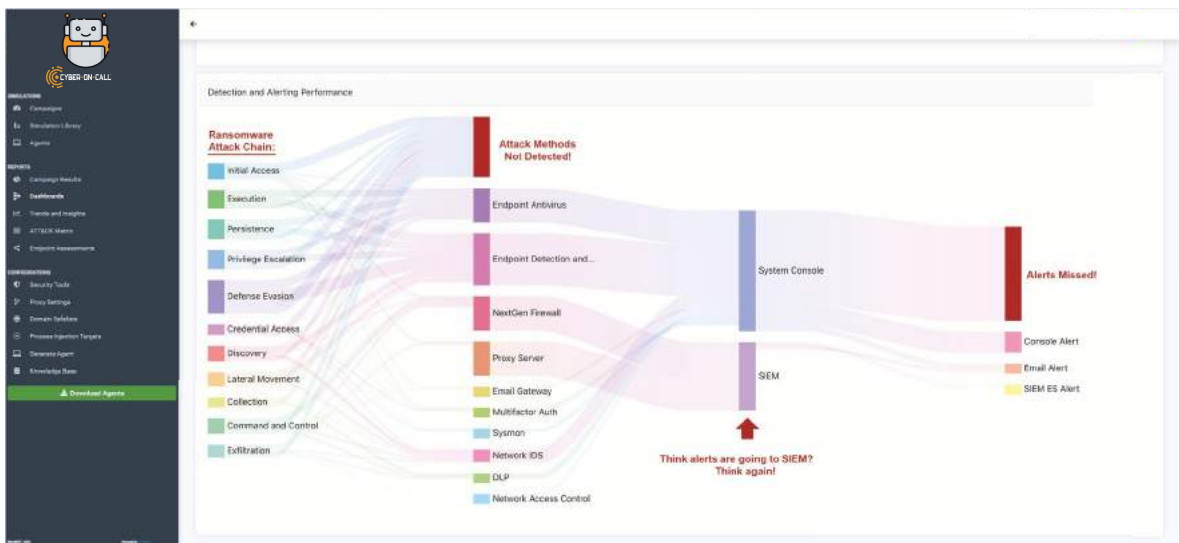

Continuously Strengthen Your Clients' Security Posture with BlindSPOT

- ✓ Simulate real-world attacks to expose security coverage gaps.
- ✓ Provide visibility into security tools posture and effectiveness.
- ✓ Deliver detection and prevention improvement guidance.
- ✓ Level your clients' playing field so they will be ready for the real attack.

What about the rest of the year? What about all of the ransomware, supply chain, and other attack techniques that will expose additional security coverage “blind spots”?

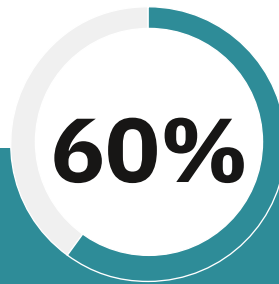

COMPANIES NEED CONTINUOUS VALIDATION OF THEIR SECURITY.

BlindSPOT empowers your firm to continuously simulate an extensive catalog of attacks to expose your clients' security tool “blind spots” while creating a reliable recurring revenue stream.

BlindSPOT clearly visualizes gaps in your security configuration.

TRANSFORM YOUR CONSULTING PRACTICE.

TIME REDUCTION

Optimize Purple Team engagements with **60% decrease** in consultant time. BlindSPOT automates Red Team activity, providing a streamlined interface to evaluate and score the network defense teams results.

GIVE CISOs WHAT THEY WANT.

CISO's have checked-the-box by investing in security tools. Network defenders depend on these tools to work but lack the opportunity to practice and verify they work as expected. With BlindSPOT, you can help network defenders level the playing field while justifying the CISO's security spend.

STAY STICKY WITH YOUR CLIENTS.

Attracting and retaining clients in a competitive market is tough with **70%** of businesses changing providers **every 2-3 years**. With BlindSPOT, you can augment your existing services, create stickiness with ongoing engagements and deliver high-quality results with fewer resources.

WIN NEW CLIENTS.

The most common response when selling penetration and consulting services is, "We already work with a firm that provides those services". With BlindSPOT, this answer will no longer be a barrier to acquiring new clients or displacing your competition, as you will have the desired solution that the competition simply can't provide.

DRIVE RECURRING REVENUE & ADD-ON SERVICES.

Over 50% of BlindSPOT projects convert into recurring revenue opportunities while also identifying gaps. These areas for improvement drive additional engagements for manual testing, consulting services, security product sales, and more.

Contact us today to discuss how to expand your practice with BlindSPOT.
